**CFA<sup>®</sup> Level I - Test Prep**

A Solid World Class Solution  
Presented to you by HRD Fund

Fully sponsored by the HRD Fund for Banking & Financial Sector employees only

Worldwide, 45% of candidates taking the June 2009 Level I, Level II, Level III exams passed. Middle East pass rates are typically even lower. HRD achieved a high pass rate of 51% combined across the three levels. The HRDF CFA® Level I, Level II and Level III study program will suit candidates who need ongoing local support over the seven-month study period to help them through the gruelling CFA Program.

HRD Fund sponsored programme is unique because of:

- The experience of our trainers/tutors who are all CFA Charterholders
- Our unwavering commitment to teach to the assigned CFA curriculum and prepare candidates for the exam experience
- The high number of instructor-led study hours and the instructional quality of our programs
- The Quality of our classroom materials, developed directly from the assigned CFA curriculum, so candidates learn what the examiners want them to know, not what somebody else thinks they should know.

## The HRD Fund Program includes:

- Up to 210 hours of classroom instruction by CFA charterholder and experienced trainer
- Candidate Screening – Selection Interviews
- Candidate Registration and Exam Fee (after completion)
- CFA Level I, Level II or Level III Curriculum (6 volumes of books published by CFA Institute)

We use the official CFA Institute material, not third-party prep course material, so you learn from the same source material that the examiners will use.

**This modular study program  
is fully funded by the HRD Fund**

maximizes **your chance of success**

## Our Approach

The CFA Institute recommend a minimum of 250hrs study time for candidates sitting the CFA Level I exam. With over 200 hours of expert instruction this modular study program is designed to maximize every candidate's chances of success on exam day.

This seven-month modular program encourages candidates to adopt a more disciplined approach to exam preparation and to spread learning over the time available to them rather than cramming as they get closer to the exam.

Classes are engaging, interactive, and fun to be in. Learning is reinforced with constant activities and exam techniques are honed by asking candidates to regularly answer exam-like questions within a set period of time. This approach helps candidates to feel more confident when, at the end of their studies, they sit for the online sample (mock) exams.

If you have questions about the CFA Program, then check out this website: <http://www.cfainstitute.org/tookit>. Here, candidates can watch an interactive exam preparation guide to determine if the CFA Program is right for them. **We seek disciplined candidates who can dedicate over 250 hours of self-study over eight months, or about 2 hours per day in addition to class time.**
